

The Hospitalist & The Resuscitator

April 18th-19th, 2018

Santa Cabrini Hospital, Montreal

Two awesome days in Montreal where we focus on basics, but the right basics. The key points, the key pearls, and especially, the key physiological points in managing sick people. Day 1, pretty sick people. Day 2, really sick people. Do one day, do both, whatever fits your practice and your fancy.

Short, to-the-point presentations. No endless diatribes about nonsensical p values, no big pharma-sponsored talks.

Just solid medicine. But not yesterday's medicine. Tomorrow's.

Come join us.

Faculty

Denault/Farkas/Kenny/Spiegel/Rola/Fadlallah/Palumbo/Barriga/
Beaubien-Souligny/Kaud/Maggio and more...

Preliminary Program

The Hospitalist

April 18th

The Hypoxic Patient
Hematology Pearls
Cardiology for the Wards
Urine Issues
Gastroenterology Tidbits
Rheumatology Quick & Dirty
Acid-Base for the Wards
I Can't Breathe: Ward management
Neurological Emergencies
Potassium & Sodium Highs & Lows
Hospitalist POCUS
Infectious Diseases Practicum
Pulmonary Embolism
CHF: POCUS & New Therapies
NOACs - Bleeding & Reversal
Horizon Talk: Genomics & Proteomics.

...and more...

CME accredited

The Resuscitator

April 19th

Mind-opener: Truth behind Stats
Fluids 1 - What's in the Bag?
Fluids 2 - When do I Give?
Fluids 3 - When do I Stop?
Vasopressors & Inotropes
Sepsis Today & Tomorrow
ETCO₂
Resuscitation Goals
Cerebral & Somatic Oximetry
Driving Pressure
Arrest TEE
Venous Congestion & MSOF
Flip'em: The Prone Position
Pitfalls in PE management
Glycocalyx - what I need to know

Workshops

Shock POCUS

The Surgical Airway

Arrest TEE

Portal/Hepatic Vein POCUS

Workshops

Shock POCUS - a rapid approach to the patient in shock, from both a diagnostic and therapeutic point of view. Perfect for novice and intermediate POCUSologists to improve their POCUS skills in critical situations.

The Surgical Airway - using manikins, participants will learn and perform emergency cricothyrotomy and percutaneous tracheostomy techniques.

Arrest TEE - following a brief review of the evidence behind TEE in arrest, participants will learn the necessary basic views using a hands-on, highly realistic TEE simulator.

Portal/Hepatic/Renal POCUS - participants will learn how to find and use doppler to interrogate the renal, hepatic venous and portal system and integrate this into their resuscitation skills. Best suited for the intermediate to advanced POCUSologist.

POCUS for the Hospitalist - participants will learn how to image and assess the IVC, the pleural space and the kidneys and understand the clinical applications. Open to all levels of sonographers, but best suited to beginners/intermediates.

EKG Cases - test and improve your diagnostic skills with highly relevant clinical cases.

Limited to 8-10 participants per workshops, so reserve your spot soon!

and is there something you are dying to learn?...ASK US FOR A WORKSHOP - it just might happen!

The H&R 2018 Scientific & Organizing Committee:

Philippe St-Arnaud, MD, CCFP-EM - ER and critical care doc, POCUS instructor, Arrest TEE coordinator and constantly pushing the clinical envelope.

Carola Zambrana, MD, CCFP - our Hospitalist on the panel, constantly seeking excellence in care and working on bringing POCUS to the wards.

Mario Rizzi, MD, FRCP - our friendly neighborhood respirologist and educator.

Marco Charneux, MD, FRCP(C) EM/CC - ER chief as well as critical care doc with a passion for teaching the next generation.

Philippe Rola, MD, FRCP(C) IM - critical care doc, long time POCUS aficionado and instructor, working at bringing POCUS into the everyday physical exam and resuscitation to a better place.
